

Marketing Carbon Credits: Opportunities for Ag and Forestry

Farms and forests have a lot to contribute to New Jersey’s healthy soils, clean water, and clean air. Cap and Trade programs offer opportunities for agriculture to market and sell carbon credits. North Jersey Resource Conservation and Development (RC&D) is hosting a carbon trading workshop for forest and farm landowners, agricultural producers, private consultants and agency staff. If you are interested in learning more about how carbon trading can benefit you, complete and submit the registration form below.

Topics that will be covered in the program include an introduction to carbon trading, an overview of the sources of greenhouse gases from agriculture, natural resource opportunities for carbon trading, and examples of individual experiences with carbon trading.

The program will be held at the Pequest Trout Hatchery and Natural Resource Education Center. Sandwiches will be served and registration will begin at 5:30 PM with the program beginning at 6:00 PM and ending at 8:00 PM. Informational materials will be provided. *This program is cosponsored by North Jersey RC&D, Central New York RC&D, Inc and NESARE.*

Date: April 30, 2009
